

Looking through the lens of our broad range of construction and consulting services, you can see a vast number of challenging projects. Our solutions to these challenges help make a meaningful difference in your community.

CONSULTING SERVICES

- *Preconstruction design reviews, budgeting and bidding*
- *Contractor and vender pre-qualifications*
- *Construction management and course of construction Quality Assurance*
- *Expert Witness and construction Defect Litigation Consulting*

The search for more efficient and economic designs; the development of preconstruction budgeting within the scope of your repairs or new construction projects; the building of confidence through construction management performance – all of these challenges create opportunities that expose our experience and solution oriented goals.
